Roll No	To be filled in by the candidate)	(Academic Sessions 2018 – 2020 to 2021 – 2023 )
STATISTICS	222 -(INTER PART	− I) Time Allowed: 20 Minutes
Q.PAPER – I (Objective 7	PAPER CODE =	Maximum Marks: 17

Note: Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer-book. Cutting or filling two or more circles will result in zero mark in that question.

.,	vo of more choics will result in zero mark in that question.
1-1	The index given by $\frac{\sum p_n q_n}{\sum p_o q_n}$ is:
	(A) Laspeyre's index (B) Paasche's index (C) Value index (D) Fisher's index
2	Geometric mean of 2 and 8 is:
	(A) 8 (B) 4 (C) 5 (D) 2
3	Which of the following cannot be the probability of an event:
	(A) 1.75 (B) Zero (C) 0.36 (D) 0.82
4	
	(A) 360° (B) 180° (C) 190° (D) 90°
3	In a binomial distribution, the successive trails are:
	(A) Independent (B) Dependent (C) Mutually exclusive (D) Fixed
6	If $\Sigma (X - \overline{X})^2 = 232$ and $n = 9$ then $m_2$ is
	(A) 24.78 (B) 25.78 (D) 27.78
7	If $\Sigma X = 400$ and $\Sigma = 25$ then n is
	(A) 12 (C) 18 (D) 16
8	Quantities which do no valor v
	(A) Variables (B) Constants (C) Statistic (D) All
9	In chain base method, the base period is:
	(A) Fixed (B) Constant (C) Changed (D) None
10	E[X-E(X)] is equal to:
	(A) Variance (B) Standard deviation (C) Mean (D) Zero
11	First moment about mean is always equal to:
12	(A) 1 (B) $-1$ (C) 2 (D) Zero
12	If $X = a$ , then $\overline{X}$ is equal to:
	(A) x (B) 0 (C) a (D) 1
13	Binomial distribution is negatively skewed if:
	(A) $p < q$ (B) $p > q$ (C) $p = q$ (D) $p = 0.5$
14	If a distribution is mesokurtic, then:
	(A) $\beta_2 = 3$ (B) $\beta_2 < 3$ (C) $\beta_2 > 3$ (D) $\beta_2 \neq 3$
15	The number of values falling in a particular category is called:
	(A) Tally mark (B) Class (C) Frequency (D) Class mark
16	
10	
177	(A) Zero (B) 1 (C) $-1$ (D) 2 If X is a random variable, then $V(X)$ is:
1/	,
	(A) $E[X - E(X)]$ (B) $E[X - E(X)]^2$
	(C) $E(X^2) - [E(X)]^2$ (D) Both B and C

Re'll No (To be filled in by the candidate) (Academic Sessions 2018 - 2020 to 2021 - 2023) **STATISTICS** 222-(INTER PART - I) Time Allowed: 2.40 hours PAPER – I (Essay Type) Maximum Marks: 68 SECTION - I 2. Write short answers to any EIGHT (8) questions : 16 (i) Differentiate between population and sample. (ii) Define parameter with example. (iii) What is statistical average? (iv) What is the formula of combined arithmetic mean? (v) If the values of  $Q_2$ ,  $D_5$  and  $P_{50}$  are equal to 27.12, then find median. (vi) Explain mode with example. (vii) Average = 70, number of values = 5, find the sum of values. (viii) Define geometric mean. (ix) Explain the chain base method. (x) What is Laspeyre's index number? (xi) Why Fisher's index number is called ideal? (xii) What is base period? 3. Write short answers to any EIGHT (8) questions & 16 (i) What are the different methods of presentation of data (ii) Define class boundaries. (iii) Given that  $Q_3 = 178$ , Q and the value of (iv) How is variance defined, also its formulae? (v) A student calculated mean and standard deviation of 25 observations as 20 and 4 respectively. Find the value of coefficient of variation. (vi) Define symmetrical distribution. (vii) If variance is 5 and third moment about mean is -12.8, find  $b_1$  and discuss the distribution. (viii) If mean = 20, mode = 15 and coefficient of skewness equal to 1, then find variance. (ix) Define combination with example. (x) What is the answer of  ${}^6C_4$  and  ${}^6P_4$ ? (xi) Define the terms (i) Event. (ii) Sure event. (xii) If P(A) = 0.6, and P(B/A) = 0.4, then find  $P(A \cap B)$ 12 4. Write short answers to any SIX (6) questions : (i) Three coins are tossed, let X be the number of heads. Write all possible values for X. (ii) Define continuous random variable. (iii) What is meant by probability distribution? (iv) What are properties of expectation? (v) Given a random variable X with E(X) = 0.63 and var(X) = 0.2331, find  $E(X^2)$ (vi) What are properties of binomial distribution? (vii) In a binomial distribution mean = 4.2 and variance = 1.68, find its both parameters.

(Turn Over)

- 4. (viii) Define hyper-geometric probability distribution.
  - (ix) A random variable X has hyper-geometric distribution with N = 10, n = 4 and K = 3, find P ( X = 0 )

## **SECTION - II**

## Note: Attempt any THREE questions.

5. (a) Find the mean for the following distribution:

Classes	0 – 10	10 - 40	40 – 90	90 - 100	
f	40	110	150	20	

(b) Find the value of upper quartile: Q<sub>3</sub>

Groups	0-4.9	5 – 9.9	10 – 14.9	15 – 19.9
f	3	4	9	4

6. (a) Calculate mean deviation from median from the given data:

Marks	20 – 29	30 - 39	40 – 49	50 - 59
No. of students	3	20	13	6

(b) Compute the coefficient of skewness using the averages and standard deviation.

Groups	0 – 10	10 - 20	20 - 30	30 - 40	
f	<i>f</i> 4		7	2	

7. (a) Find index number taking (i) the year 1930 as base. (ii) average of 1st 3 years as base: 4

Years	1930	1931	1932	1933	1934	1935	1936	1937	1938	
Prices	4	5	6	.7	8	10	. 9	10	11	

- (b) Two cards are drawn from a well-shuffled pack of 52 cards. Find the probability that:
  - (i) One is king and the other is queen. (ii) Both are of different colours.
- 8. (a) A fair coin is tossed three times. Set 'X' be a random variable which denotes the number of heads. Make the probability distribution of X.

(b) A continuous random variable 'X' has probability density function given by : f(x) = c. x for 0 < x < 2

Find (i) C (ii) P (
$$1 < x < 1.5$$
)

9. (a) In a binomial distribution, n = 4 and  $p = \frac{1}{3}$ . Obtain the probability distribution of

0, 1, 2, 3 and 4 successes.

(b) Given that 'X' is a hypergeometric random variable with N=8, n=3 and K=5. Compute  $P(X \le 3)$
